custom milling | smart assemblies

Designed to streamline installation and improve finished results, the GRAD system creates a clean, fastener-free surface while reducing labor time on site.

PROJECT SUPPORT

Our team provides the expertise needed to turn design concepts into production-ready products without the fuss.

PRECISION MANUFACTURING

Advanced milling equipment and quality control procedures to produce precise results across every board with consistent groove dimensions.

QUICK TURNAROUND

Whether your project requires standard profiles or specialized custom milling, our streamlined production process help keep projects moving.

CENTRALLY LOCATED

Strategically located in the Chicagoland area near O'Hare Airport, we serve as a central distribution and manufacturing hub for projects across North America.

Cladding & Siding

Custom milling for cladding & siding, delivering clean hidden-fastener installations with consistent results. Precision groove profiles support modern designs while improving installation efficiency & long-term durability.

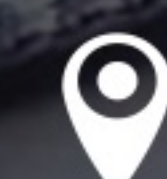

Decking & Patios

Produce custom GRAD-milled decking and patio boards that combine premium aesthetics with installation efficiency, helping contractors complete outdoor living spaces faster with complete accuracy.

Ceilings & Walls

Custom milling for ceilings & walls, creating sophisticated wood surfaces with concealed fastening and precise alignment. Consistent profiles support modern interiors while improving installation efficiency & visual appeal.

HOW GRAD WORKS AND WHY YOU SHOULD USE IT

WHY BUILDERS CHOOSE GRAD

- Hidden Fasteners**
No visible screws or plugs
- Faster Installation**
Reduce labor compared to face fastening
- Consistent Alignment**
Uniform spacing & clean board layout
- Board Replacement**
Individual boards can be removed & replaced
- Premium Appearance**
Modern, uninterrupted wood surfaces
- Indoor & Outdoor Applications**
Suitable for facades, ceilings, walls, decking, gates and soffits.

HOW IT WORKS

01

Design

- Select species, profile & application
- Cladding, decking, ceilings, walls, soffits

02

Mill

- EWP custom mills precision grooves
- Compatible with a range of wood species

03

Install

- GRAD rails are fastened to the substrate
- Boards simply clip into place

04

Finish

- No visible screws, consistent spacing
- Clean architectural appearance
